EXECUTIVE VISIBILITY

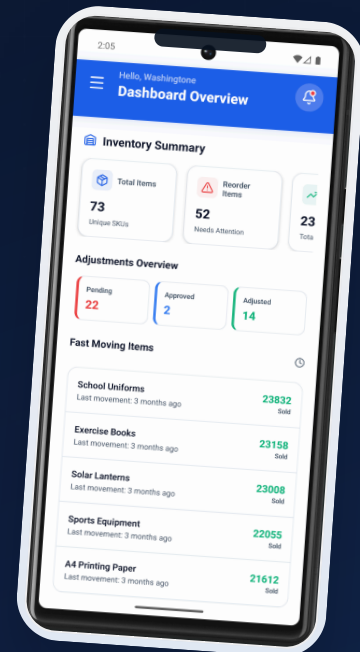

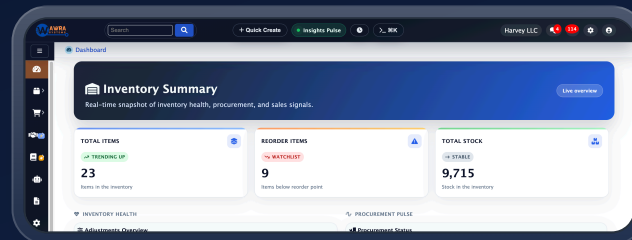

Track stock, purchases, approvals, finance activity, and real-time performance from one connected dashboard designed for fast operational decision-making.

BUILT FOR ACTION

We help teams move from reporting to execution faster with live workflows, centralized records, and role-based visibility across the organization.

We built Awra OpsHub to give growing organizations one intelligent place to run operations with confidence, speed, and clarity.

Built for control, speed, visibility, and smarter decisions.

We built Awra OpsHub for businesses, schools, NGOs, retail teams, warehouses, hospitality, and service organizations that need one system to replace manual workflows and disconnected tools.

CORE MODULES

- Smart inventory management with live stock, transfers, and adjustments.
- Automated procurement with RFQs, approvals, vendors, and purchase orders.
- Sales, invoicing, POS integration, and customer transaction tracking.
- Financial reporting linked to real operational activity and approvals.

A

AI Insights

Surface trends, anomalies, and predictive signals for better decisions.

R

User Roles

Secure permissions, approvals, access control, and auditability.

M

Mobile Access

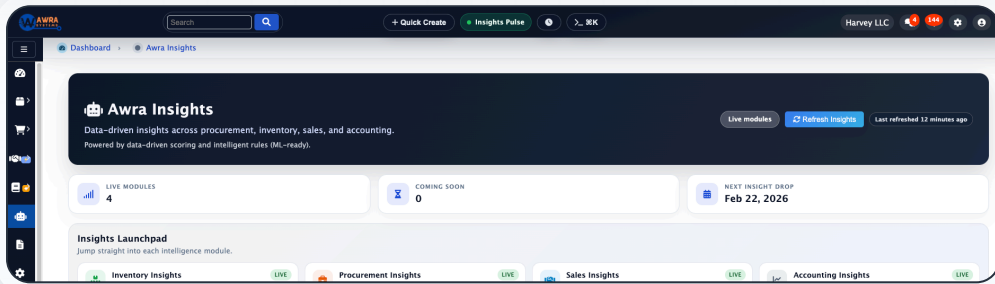

Stay connected from the office, branch, warehouse, or field.

D

Dashboards

Monitor performance, exceptions, and activity in real time.

At Awra Systems, we position Awra OpsHub as the operational backbone for organizations that need clarity, accountability, and connected execution across every department.

WHY TEAMS CHOOSE AWRA

We give leadership, finance, procurement, operations, and frontline teams one connected system for visibility, faster approvals, and consistent execution across the organization.

OPERATIONAL IMPACT

Awra OpsHub helps teams reduce fragmentation, shorten approval cycles, improve reporting quality, and standardize day-to-day execution across branches, departments, and field operations.

We give leaders a full desktop experience for oversight, reporting, and end-to-end management, while frontline teams and supervisors get mobile access for approvals, updates, and operational execution.

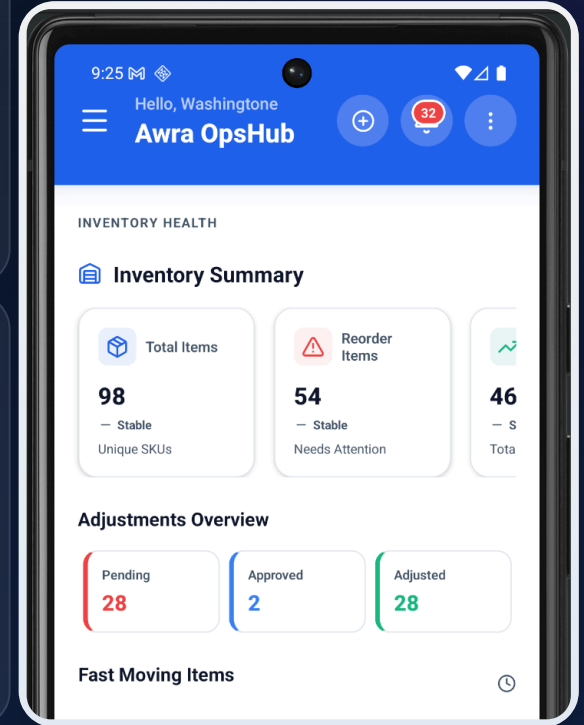

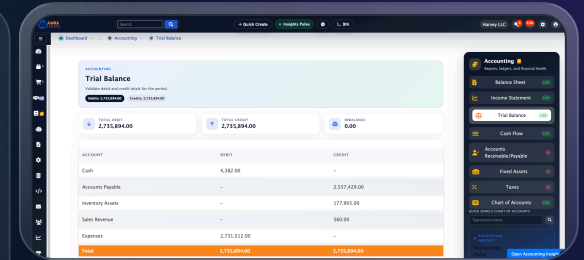

SCAN TO EXPLORE

Open Awra OpsHub, discover the platform, and connect with our team online.

We use this touchpoint to guide prospects to product demos, rollout updates, and direct support from Awra Systems.

- Direct prospects to live demos, product pages, and onboarding conversations.
- Support faster follow-up by linking print engagement to digital action.
- Make it easy for decision makers to move from interest to a real product conversation instantly.

CONNECTED EXPERIENCE

- Manage operations anytime, anywhere.
- Approve requests and monitor activity from your phone.
- Keep staff aligned with live notifications and workflow status.

Our web and mobile experiences stay synchronized, so supervisors, managers, and teams can move from oversight to action without losing context.

- Switch from dashboards to approvals to field updates in one continuous workflow.
- Maintain accountability across departments, branches, and teams on the move.
- Keep every team member aligned with one live source of truth across devices.

With Awra OpsHub, we keep office teams, branch teams, warehouses, and staff on the move synchronized in one live operational environment.

MOBILE + DESKTOP ADVANTAGE

We combine full-screen operational control with mobile-first execution, giving every team the right interface for approvals, tracking, reporting, and rapid action wherever work happens.
