

AWRA OPSHUB · OPERATIONS AND FINANCE LEADS

AWRA OpsHub Product Brochure

One operating system for stock, spend, sales, assets, people and money.

One record from the request to the ledger

In most organizations the purchase request, the stock it delivers and the payment that settles it live in three places — a form, a spreadsheet and the accounts. AWRA runs them as one chain of records. A request becomes the order, the order becomes the goods receipt, stock moves when the goods arrive, and the ledger entry follows the work instead of being typed in again.

Start with one module, usually inventory or procurement, and switch on the rest as you need them. Approvals, people, branches, documents and the audit trail are shared underneath, so nothing is re-entered when a new module is turned on.

The nine modules

Inventory & warehouse

Live stock across warehouses and branches, with transfers, adjustments, counts, quality holds, batch and expiry tracking, and reorder alerts.

Procurement & vendors

Requests and approvals, RFQs with side-by-side quote comparison, purchase orders, receiving against what was ordered, and supplier performance.

Sales & billing

Customers, quotations, invoices, credit notes, statements and collections — each one moving the stock and the ledger behind it.

Point of sale

A fast selling screen with shifts, till and cash drawer reconciliation, and cash, card and mobile money payments.

Assets

Equipment, vehicles and devices with custodians, tagged movements, signed handovers, depreciation and a fixed asset register.

People & HR

Employee records, contracts, leave, attendance, shifts, timesheets and configurable statutory payroll that posts to finance.

Projects & tasks

Projects, milestones, Gantt planning, sprints and time tracking, with budgets measured against the purchases and hours booked.

Helpdesk

Email, chat and portal requests become tickets in department queues, with a named owner, SLA timers and escalation.

Accounting & finance

Chart of accounts, general ledger, expenses, budgets, aging, income statement and balance sheet, fed by every module above.

The platform underneath every module

Approvals & workflow automation

Routed approvals, reminders, exceptions and a single action queue for what needs a decision.

Reports & BI Studio

A report catalog, custom reports, saved filters and scheduled delivery to the people who need them.

AWRA Intelligence

Insights across inventory, procurement, sales and accounting, plus in-app AI assistants.

Integrations & API

QuickBooks sync with health checks, a developer API, webhooks and a sync hub you can audit.

Mobile & offline

An Android app that keeps receiving and counting with no signal, and a phone that pairs as a scanner.

Vendor & supplier portals

Suppliers apply, prequalify, answer RFQs, quote and follow their purchase orders through their own login.

Employee self-service

Staff view payslips, request leave and raise support tickets from a phone, through a secure PIN-protected link.

Documents & signatures

A document vault, branded documents, compliance evidence packs and signature-captured handovers.

Security & audit trail

Role permissions, MFA, passwordless sign-in, device trust and an audit trail on sensitive actions.

Notifications & alerts

Smart alerts by email, push and in-app, with each person choosing what reaches them.

Search & command palette

One search across records and a keyboard palette that jumps straight to the action.

Custom fields & setup

Custom fields, departments, locations, reason codes, bulk import and a trash you can recover from.

Capability checklist

CAPABILITY	AWRA	WHAT IT COVERS
Inventory	✓	Multi-warehouse stock, transfers, counts, batch and expiry
Procurement	✓	Requisitions, approvals, purchase orders and goods received
RFQ & quotation comparison	✓	Invite suppliers, compare quotes side by side, award
Vendor portal	✓	Suppliers apply, prequalify, quote and track POs themselves
Point of sale	✓	Shifts, till reconciliation, cash, card and mobile money
Accounting	✓	General ledger, expenses, budgets, aging and statements
HR & payroll	✓	Employees, leave, attendance and statutory payroll
Assets	✓	Custodians, signed handovers, depreciation, fixed asset register
Projects	✓	Milestones, Gantt, sprints, time tracking and budgets

CAPABILITY	AWRA	WHAT IT COVERS
Helpdesk	✓	Tickets from email, chat and portal, with SLA timers
Offline mobile	✓	Android app that keeps receiving and counting with no signal
AI insights	✓	Risks and next steps across inventory, procurement, sales and finance
M-Pesa	✓	STK Push and C2B collections on your own Daraja credentials
KRA eTIMS	✓	Live invoice and credit note filing for Kenyan organizations
QuickBooks	✓	Vendors, items and purchase orders synced, with health checks
